

Project Name:	EzTravel
Project Lead:	
Directorate:	Shobbit Sinha
Closure Date:	4/28/2024

1 PROJECT CLOSURE - SYNOPSIS

Summary of Performance and Outcomes (Required)

The objective of the Project was...

Create a fully functional site that allows the user to see places, activities, hotels and flights for various locations. Create an itinerary function that allows a user to save and favorite a trip itinerary, and then book their reservations once complete.

Work completed:

1. Searching of Places
2. Exploring Places including Hotels, Flights, and Activities
3. Login / Signup including email/password, MFA via email, login with Google, and secure storage.
4. Itinerary with Full Functionality including a planning page, display via day-wise or place-wise. It also includes a map of places and booking options/details.
5. We implemented Bookings with a placeholder payment system and fully featured details for booking flights and accommodations including email/SMS for booking.
6. Sharing the Itinerary was implemented allowing users to share itineraries with comments.
7. Reviews and Ratings are shown for places and hotels.
8. Recommendations are shown to users.
9. Users can convert many types of currencies.

2 SCOPE MANAGEMENT

Unplanned Changes to Project Scope (Optional or "NA")

N/A

3 LESSONS LEARNED

Summary of Lessons Learned or Best Practices (Optional, “NA” or Separate Activity)

Lessons learned highlights early sprint planning, identifying dependencies and bottlenecks, enhanced communication practices, focusing on core functionality, and collaborative version control.

4 ADDITIONAL COMMENTS AND NOTES

Other Project Highlights or Notes (Optional)

Considerations:

- We discovered how to work well in Agile teams.
